

Internship Offer Letter

Date: April 22, 2026

Candidate Name: [Shaumik Khanna]

Subject: Offer of Internship – AI-Driven Mathematical & Logical Assessments

Dear Shaumik Khanna

Following our evaluation of your technical skills and logical proficiency, we are pleased to offer you an internship at Maaya Analytics Private Limited. You will be working on our ChangeBegins platform, contributing to the future of agent-driven talent intelligence.

1. Duration and Compensation

- Duration: 10 Weeks
- Start Date: [4th May 2026] | End Date: [17th July 2026] can be extended if necessary.
- Stipend: INR 15,000 per month. This will be paid monthly, with the final month's amount pro-rated based on the completion date.

2. Scope of Engagement

Your role involves the standardization and enhancement of our AI-driven assessment repository. Your core responsibilities, as discussed, include:

- Template Enhancement: Refining 173 templates in Numerical and Logical domains to ensure CAT/GMAT level rigor.
- Cognitive Mapping: Aligning question structures with Bloom's Taxonomy for calibrated difficulty scaling.
- Problem Parameterization: Designing "problem families" using Python and TypeScript to ensure LLM-driven variations maintain mathematical integrity.
- Validation & Metadata: Finalizing cognitive metadata for 43 incomplete templates and building internal validation tools using React/Next.js.
- Edge Case Testing: Ensuring absolute mathematical correctness and logical consistency across the repository.

3. Expectations & Technical Standards

As this role requires expert-level Python/TypeScript and a strong foundation in algorithms, you are expected to maintain high code quality and mathematical precision. You will report to Suresh Krishnamurthy for weekly progress reviews and validation of the parameterized templates.

This will be a hybrid working environment that might necessitate presence in office 2 days a week.

4. Confidentiality and Intellectual Property

By accepting this offer, you agree that all code, templates, mathematical models, and metadata developed during these 10 weeks are the exclusive property of Maaya Analytics. You agree to maintain strict confidentiality regarding the internal mechanics of the ChangeBegins platform.

5. Completion

Upon successful delivery of the standardized repository and validation tools, you will receive an Internship Completion Certificate recognizing your contribution to high-fidelity AI simulation technology.

Acceptance:

Please sign and return this letter by [28th April 2026] to confirm your start date.

For Maaya Analytics Private Limited,
